SCREEN FEATURES

PLAYING A VIDEO ON THE HOME PAGE

The desired video is played on the main page and it is easily changed via software.

PRODUCTS DEFINED TO PERSONNEL

When the personnel scans his/her card, only the products defined for him/her appear on the screen.

There are pictures and descriptions of defined ppe products on the screen.

SMART PRODUCT SELECTION

Personnel can access their periodic rations and remaining rations on the screen. The spirals of the equipment are displayed on the screen and can be easily received by tapping on the screen.

PRODUCT INSTRUCTIONS FOR USE

When the personnel selects the corresponding spiral number on the screen, the product's instructions for use appear on the screen as a picture or video.

RECEIVE PRODUCTS QUICKLY

The equipment is quickly received by dialing the corresponding spiral number on the Receive fast product tab.

SPECIAL IMPROVEMENT

Special improvements can be made according to the customer's request.

SOFTWARE FEATURES

1

WEB-BASED TECHNOLOGY

The software is web-based.

LANGUAGE OPTIONS

Different language options are available in the software.

PERIOD DEFINITION

The number of equipment receivable via personnel cards is defined periodically (Indefinitely/daily/weekly/monthly) through the software.

AUTHORIZATION

The required amount of user interfaces can be defined and users can be given different authorizations.

VENDING MACHINE STOCK SITUATIONS

Stocks of all vending machines can be accessed instantly.

LICENSE FEE

After the license is purchased, there is no charge for the annual license fee and updates.

CONSUMPTION REPORTS

All reporting and consumption data can be accessed instantly. Reports can be downloaded or printed as excel, pdf or html.

DEFINING RATIONS

Rations can be defined on a department or personnel basis. Batch uploads and updates can be made with Excel format.

UNNECESSARY INVENTORY BARRIER

Time barriers can be imposed when a personnel tries to receive the same product a second time.

ADVANTAGES

- ✓ Up to 30 % equipment savings can be achieved.
- ✓ Saves time for personnel.
- ✓ Personnel-based equipment can be tracked, and personnel who do not use equipment can be identified.
- ✓ All equipment can be distributed through the ration system.
- ✓ The vending system works with the personnel's own cards.
- ✓ Consumption reports based on factory, department, personnel and equipment can be obtained.
- ✓ Reports can be downloaded or printed as excel, pdf or html.
- ✓ By integrating the software with SAP and similar programs, you can make personnel entries and warehouse tracking automatically.
- ✓ Using the wrong equipment can be avoided.

CONVERSION OF VENDING MACHINES

We can convert the old type of occupational safety vending machines that you previously purchased for your company to new technology.

The converted vending machine works by integrating with Meta Ganos occupational safety software.

All the features in the Meta Ganos occupational safety vending machine can be transferred to the converted vending machine.

Thanks to the 15.6 inch touch screen computer to be added next to the vending machine, the personnel can easily take their equipment from the vending machine with full information.

OUR ADDED VALUE TO OUR COUNTRY

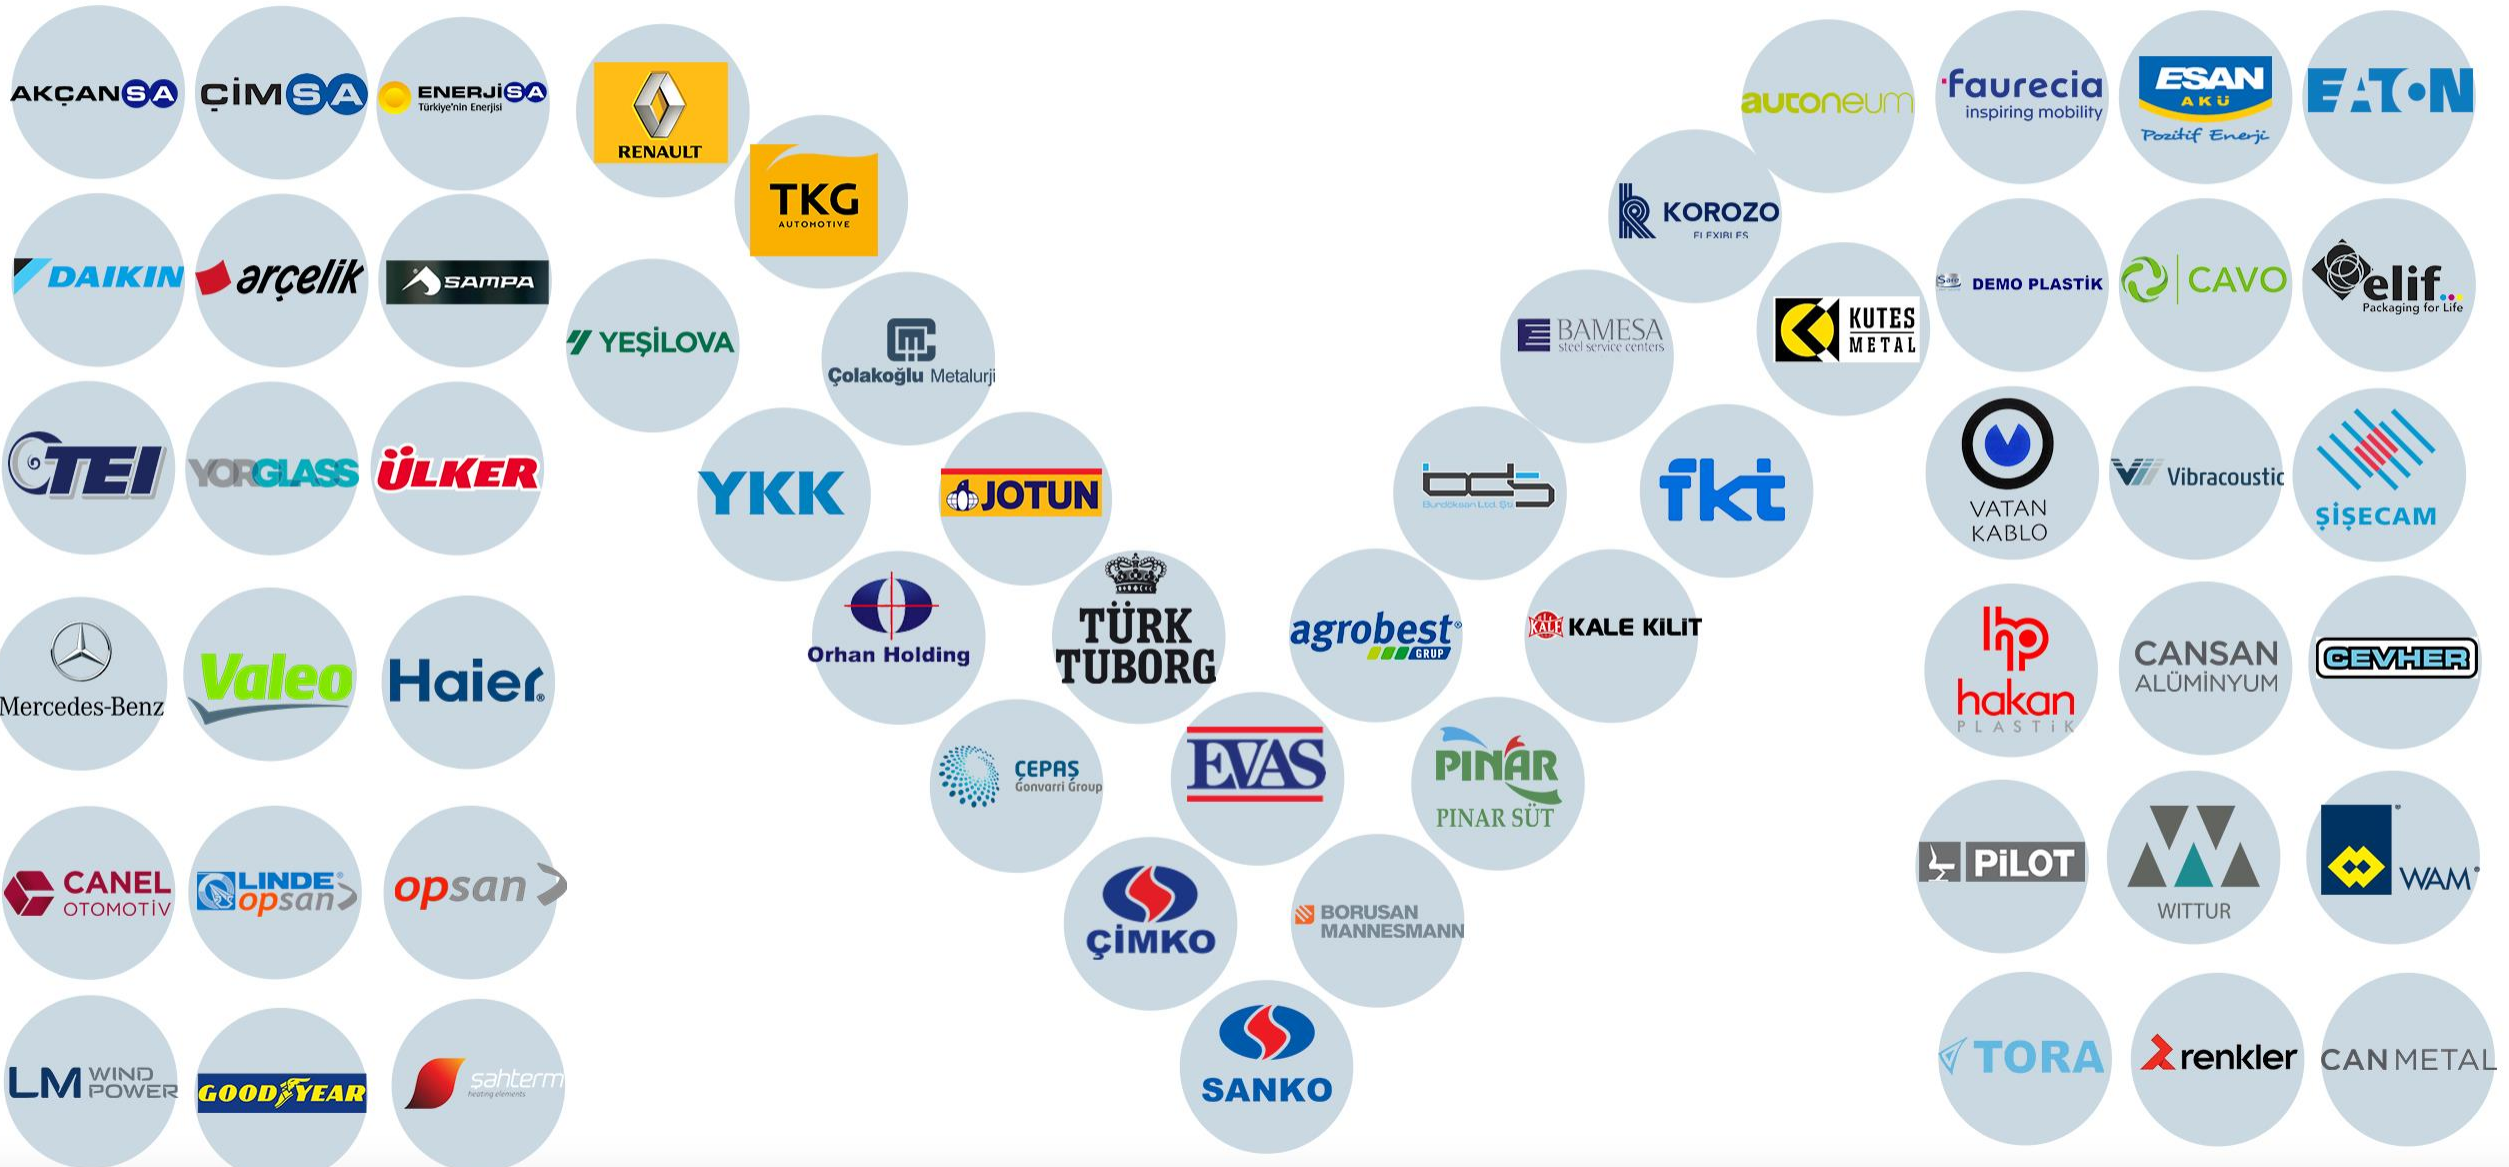

By eliminating embezzlement forms, we prevent **150 thousand trees** from being cut down annually

Annual PPE equipment savings of our references
TRY 650 Million

Annual personnel time savings of our references
TRY 390 Million
